EDUCATION

APJ Abdul Kalam Technological University
B Tech Electronics and Communication

July 2018 – Jun 2022
Thiruvananthapuram, Kerala

- GPA: 6.9

WORK EXPERIENCE

Polus Solution
Software Engineer l

February 2023 – Present
Thiruvananthapuram. Kerala

- Developed a user-friendly tool using JavaScript
- Designed and built web applications from scratch using Angular, focusing on a smooth and efficient user experience.
- Integrated APIs to ensure seamless application functionality.
- Developed responsive front-end components with JavaScript and Angular.
- Collaborated with international teams for project planning, development, and troubleshooting.

Luminar Technolab
Intern

August 2022 – February 2023
Calicut, Kerala

- Built and maintained web applications using the MEAN stack, ensuring efficient and scalable code.

SKILLS

- Programming Languages & Frameworks: JavaScript, TypeScript, Angular, React, Node.js
- Web Technologies: HTML, CSS, SASS, Tailwind, Bootstrap
- Databases: SQL, MongoDB
- Tools & Platforms: GitHub, JIRA, DaisyUI, React Bits

PROJECTS

E-Research Administration Tool JavaScript, JIRA
I contributed significantly to the development of an e-research administration tool, collaborating closely with developers based in the US. My primary responsibility was to create a user-friendly application using JavaScript. I participated in continuous meetings to ensure code quality and maintain high standards. This project enhanced my ability to work in an international team setting and honed my skills in front-end development and user experience design.

Angular Web Application Angular, TypeScript, HTML, CSS, SASS, Bootstrap, JIRA, GitHub
I had the opportunity to design and develop web applications from scratch using Angular. My responsibilities included crafting sophisticated UI designs and integrating APIs to ensure seamless functionality. This experience allowed me to utilize my creativity and technical skills to develop a comprehensive and efficient application. Working on these projects from its inception to completion deepened my understanding of front-end development and API integration.

React Web Application React, JSX, Tailwind, CSS, Hygraph

I had built responsive, SEO-friendly web application using React and Next.js, integrating Hygraph as a headless CMS. I modeled content and authored custom GraphQL queries to fetch and manage dynamic content, and leveraged Next.js's server-side rendering to deliver fast, up-to-date pages. Throughout the project, I maintained a clean, modular codebase using React Hooks and the Context API

AWARDS

Employee of the Month   December 2024

As a junior developer on the team, I was awarded Employee of the Month for helping lead the development and on-time delivery of a JavaScript application that earned direct client praise for its quality and usability. This underscores my ability to collaborate effectively, manage key project responsibilities, and deliver high-impact results early in my career.   Polus Solutions
